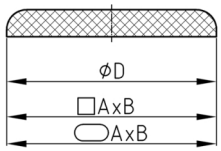
Technische Kunststoff - und Hybridprodukte

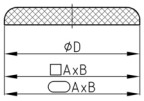
Product Group UG/OV

Oval universal glides with PTFE gliding surface, self-adhesive



Standard Colours
- grey

Material
- Base body: rubber / EVAC
- Slide base: Polytetrafluorethylene (PTFE)
- acrylate adhesive



Product information
- Very good noise damping through rubber- / EVAC-buffers in the gliding insert.
- Good slippage due to PTFE gliding base surface
- Well suited for textile/carpet floors
- The floor glider is conditionally suitable for smooth floors (unintentional slipping of the chair - to be tested by the user).
- The abrasion of the sliding surface depends on the condition of the floor (surface, soiling of the floor, etc.) and the load on the chair (must be tested by the user, the manufacturer cannot provide any guarantee).
- The suitability of the adhesive surface for the intended use must be checked by the user in advance (a durability guarantee cannot be given by the manufacturer).
