

Product Group RGL

Threaded plugs made of PA for round tubes with injection moulded plastic thread, two-parts

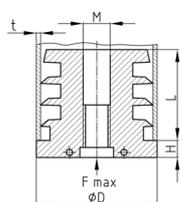

Standard Colours

- black

Material

- Base body: Polyamide (PA 6)

- OB = without collar; under pressure load this plug can press into the pipe. This can be prevented, for example, by placing a metal washer underneath that is larger than the internal pipe dimension.
- Please also note the product groups Tube Connectors RVBx and Expander Bushings EBx in our article category "Fasteners".
