

Product Group PR/PVC

Slide washers made of soft PVC with boring for fastening with countersunk screws (90°)

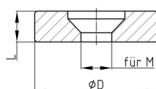

Standard Colours

- black RAL 9005
- signal white RAL 9003
- uncoloured

Material

- Plasticised PVC (PVC-P)

Product information

- The soft PVC type used here, with a hardness of approx. 92 Shore A, gives the gliders under chairs or upholstered furniture in some cases significantly longer wear times than gliders with a felt covering due to its considerable toughness, depending on the floor condition.
- This simultaneous in association with low stress for the floor (abrasion by transparent material colour) and with good stopping function and good noise damping.
- Version with felt, see product group PRAF/PVC

Product options on inquiry

- Special colours (colours, minimum quantities, set-up costs, pricing and surcharges)
