Technische Kunststoff - und Hybridprodukte

Product Group KBKZ2A

Assembly pole made of stainless steel for stiffening cable chains KBKCUB, KBKCMX, KBKPRO, KBKFLII and KBKPM to one cable channel

Material

- Stainless steel

Product information

- Product description for use with cable chain "KBKPRO", "KBKCUB" and "KBKPM":
- The assembly pole will be shifted through the middle tunnel aperture of the cable chain.
- The individual chain links can be moved due to the precisely fitting design.
- Traction force up to appr. 100 kg and more can be transmitted.
- The assembly pole stiffens cable guide chain to a cable channel.
- Cable chain "KBKCUB", "KBKPRO" and "KBKPM" can be assembled on the pole shifted either pushed together or pulled asunder.
- When pushed together, the result is a closed cable duct with high stability.
- By using assembly pole cable chain can be used as high-quality desk channel.
- Fixing for example at wooden furniture can carried out by 2 screws and fixing chain elements "KBKPROZ1"/"KBKCUBZ1".
- In the event of high transverse forces, the rod can be secured against displacement by using "KBKZ2C" fixing sleeve with adjusting screw.
