

Product Group MFANZ

Machine feet made of steel with niche and vibration-damping rubber base

Material

- Base body: zinc-plated steel
- Rubber: NBR 80 Shore

Product information

- The rubber of the machine base is 10 mm thick and the surface is infused with circular veins for optimum vibration damping.
- Machine tools, injection moulding units, shearing machines, vibrators, printing machines, etc. ...

Product options on inquiry

- For higher loads, a vibration-damping plate made of NBR with a hardness of 90 Shore can be supplied.
