

### Product Group MFAP

Machine feet with painted steel base, galvanised thread, clamping nut and vibration-damping rubber pad

#### Standard Colours

- daffodil yellow RAL 1007

#### Material

- Thread: zinc-plated steel
- Base: painted steel
- Rubber: NBR 75 Shore

#### Product information

- Included in the scope of delivery: 2 nuts, 1 washer, 1 tooth lock washer
- The rubber of the machine base is 10 mm thick and the surface is infused with circular veins for optimum vibration damping.
- The load capacity of the screw (buckling length!) may be less than indicated in the table.
- The machine foot is characterised by simple and precise adjustment of its vibration-damping bearing. To achieve the desired damping, the square head of the thread is turned. The adjustment is then secured with the lock nut provided.
- Machine tools, injection moulding units, shearing machines, vibrators, printing machines, etc. ...

#### Product options on inquiry

- For higher loads, a vibration-damping plate made of NBR with a hardness of 90 Shore can be supplied.
- Thread with hexagon head
