

Product Group MFDC

Form-punched machine feet with black cataphoresis dip coating and fixing holes

Standard Colours

- black

Material

- Thread: zinc-plated steel
- Base: cataphoresis painting steel

Product information

- The machine base is provided with a cataphoretic surface coating. It offers a higher resistance to chemical substances and solvents than galvanized surfaces. Particularly suitable for use with salt solutions.
- The machine foot can compensate for uneven floors up to 8°.
- The machine foot offers the possibility to personalize the base with your company logo.
- The load capacity of the screw (buckling length!) may be less than indicated in the table.
- Palletising machines, woodworking machines, general in production machines

Product options on inquiry

- Delivery with additional steel nut possible.
